

PORTFOLIO HOLDINGS FOR PIMCO REALRETIREMENT 2050 FUND

(As of Dec 31, 2009)

Investors should consider the investment objectives, risks, charges and expenses of this Fund carefully before investing. This and other information is contained in the Fund's prospectus, which may be obtained by contacting your financial advisor, by visiting www.allianzinvestors.com or by calling 888-877-4626. Please read this prospectus carefully before you invest or send money.

This list of portfolio holdings is as of the date above and is subject to change daily. This is not intended as a recommendation, offer or solicitation for the purchase or sale of any financial instrument. References to securities are for illustrative purposes only. All share classes have the same portfolio but different expenses.

The PIMCO RealRetirement Funds are a fund of funds investing in multiple sectors of the bond market including Treasury Inflation Protected Securities (TIPS), mortgage-backed securities, corporate bonds, high-yield bonds. The funds will also invest in funds specializing in commodities, real estate, small-capitalization firms, international and emerging markets, and commodity and real estate-linked derivatives. Inflation-linked bonds (ILBs) issued by a government are fixed-income securities whose principal value is periodically adjusted according to the rate of inflation; ILBs decline in value when real interest rates rise. The funds could lose money if the issuer or guarantor of a fixed income security is unable or unwilling to make timely principal and/or interest payments, or to otherwise honor its obligations. Fun invest in such securities.

Commodities contain heightened risk including market, political, regulatory, and natural conditions, and may not be suitable for all investors. Investing in non-U.S. securities entails additional risks, including political and economic risk and the risk of currency fluctuations; these risks may be enhanced in emerging markets. Smaller companies may be more volatile than larger companies and may entail more risk. Concentrating investments in individual sectors, countries, or states may add additional risk and additional volatility compared to a diversified equity portfolio. Funds may use derivative instruments for hedging purposes or as part of its investment strategy. Use of derivatives may involve certain costs and risks such as liquidity risk, interest rate risk, market risk, credit risk, management risk and the risk that a fund could not close out a position when it would be mostested in those instruments. Diversification does not assure a profit or protect against loss.

Allianz Global Investors Distributors LLC, 1345 Avenue of the Americas, New York, NY 10105, www.allianzinvestors.com, 1-888-877-4626
