2009 ANNUAL REPORT

Premier VIT—NFJ Dividend Value Portfolio

Letter to Shareholders

Dear Shareholder:

Please find enclosed the annual report for Premier VIT—NFJ Dividend Value Portfolio (the “Portfolio”) for the fiscal year ended December 31, 2009.

U.S. stocks changed course during the reporting period, ending an 18-month bear market as equities began registering gains in March 2009. Major stock indexes reclaimed lost ground during the reporting period with core, growth and value indexes at all capitalization levels moving into positive territory.

The Standard & Poor’s 500 Index, a broad measure of U.S. stocks, returned 26.46% during the 12-month reporting period. The Russell 1000 Value Index, which serves as a benchmark measure of performance for U.S. large-company value stocks, returned 19.69%. The S&P MidCap 400 Index returned 37.38% and small-cap stocks, as represented by the Russell 2000 Index, returned 27.17%. Bond markets delivered more modest results. U.S. Treasury securities, which had outperformed most investments during the bear market, gave ground. The Barclays Capital U.S. Treasury Index declined 3.57% during the 12-month reporting period. The Barclays Capital U.S. Aggregate Index, a broad measure of government and corporate bonds, returned 5.93% for the fiscal year ended December 31, 2009.

The Federal Reserve held benchmark interest rates to a historic low target range of 0% to 0.25% and pursued other initiatives designed to inject liquidity into the financial system. Under its policy of “quantitative easing,” the U.S. monetary authority purchased large amounts of securities (such as mortgage-backed securities and U.S. Treasury bonds) from commercial banks to encourage lending to consumers and businesses.

Please refer to the following pages for specific Portfolio information. If you have any questions regarding the information provided, please contact your financial adviser.

Thank you for investing with us.

Brian S. Shlissel
President & Chief Executive Officer

Past performance is no guarantee of future results. Unless otherwise noted, index returns reflect the reinvestment of income dividends and capital gains, if any, but do not reflect fees, brokerage commissions or other expenses of investing. It is not possible to invest directly in an unmanaged index.

Premier VIT—NFJ Dividend Value Portfolio

(unaudited)

Important information about the Portfolio

The Portfolio is only available as a funding vehicle under variable annuity contracts or variable life insurance policies offered by insurance companies. Individuals may not purchase shares of the Portfolio directly. Shares of the Portfolio may also be sold to qualified pension and retirement plans outside of the separate account context.

Investment products may be subject to various risks as described in the prospectus. Some of those risks may include, but are not limited to, the following: derivative risk, small company risk, foreign security risk and specific sector investment risks. Use of derivative instruments may involve certain costs and risks such as liquidity risk, interest rate risk, market risk, credit risk, management risk and the risk that a fund could not close out a position when it would be most advantageous to do so. Portfolios investing in derivatives could lose more than the principal amount invested in those instruments. Investing in foreign securities may entail risk due to foreign economic and political developments; this risk may be enhanced when investing in emerging markets. Smaller companies may be more volatile than larger companies and may entail more risk. Concentrating investments in individual sectors may add additional risk and additional volatility compared to a diversified equity portfolio. Please refer to a prospectus for complete details.

Form N-Q

The Portfolio files its complete schedule of portfolio holdings with the Securities and Exchange Commission (the “SEC”) for the first and third quarters of its fiscal year on Form N-Q. Form N-Q is available (i) on the SEC’s website at www.sec.gov, and (ii) may be reviewed and copied at the SEC’s Public Reference Room in Washington D.C. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

Proxy Voting

The Portfolio’s Investment Manager and Sub-Adviser have each adopted written proxy voting policies and procedures (“Proxy Policy”) as required by Rule 206(4)-6 under the Investment Advisers Act of 1940. The Proxy Policy has been adopted by the Portfolio as the policies and procedures that the Sub-Adviser will use when voting proxies on behalf of the Portfolio. Copies of the written Proxy Policy and the factors that the Sub-Adviser may consider in determining how to vote proxies for the Portfolio, and information about how the Portfolio voted proxies relating to portfolio securities held during the most recent twelve-month period ended June 30, are available without charge, upon request, by calling (800) 628-1237 and on the SEC’s website at www.sec.gov.

Shareholder Expense Example

The following disclosure provides important information regarding the Shareholder’s Expense Example, which appears on the following page. Please refer to this information when reviewing the Shareholder Expense Example.

Portfolio Shareholders incur two types of costs: (1) transaction costs, and (2) ongoing costs, including management fees and other Portfolio expenses. The Shareholder Expense Example is intended to help shareholders understand ongoing costs (in dollars) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds. The Shareholder Expense Example is based on an investment of \$1,000.00 invested at the beginning of the period and held for the entire period indicated which is from July 1, 2009 to December 31, 2009.

Actual Expenses

The information in the table under the heading “Actual Performance” provides information about actual account values and actual expenses. Shareholders may use the information in these columns, together with the amount invested, to estimate the expenses that were paid over the period. Simply divide your account value by \$1,000.00 (for example, an \$8,600.00 account value divided by \$1,000.00 = \$8.60), then multiply the result by the number in the row entitled “Expenses Paid” to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The information in the table under the heading “Hypothetical Performance (5% return before expenses)” provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses that were paid for the period. Shareholders may use this information to compare the ongoing costs of investing in the Portfolio and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight ongoing costs only and do not reflect any transactional costs. Therefore, the information under the heading “Hypothetical Performance (5% return before expenses)” is useful in comparing ongoing costs only, and will not help determine the relative total costs of owning different funds. In addition, if these transactional costs were included, costs would have been higher.

Expense ratios may vary from period to period due to fluctuation in Portfolio size and expenses.

Premier VIT—NFJ Dividend Value Portfolio

(unaudited)

- NFJ Dividend Value Portfolio (the "Portfolio") seeks long-term growth of capital and income through investments in undervalued mid- and large-cap securities.
- The Portfolio delivered double-digit returns during the 12-months ended December 31, 2009, underperforming its benchmark, the Russell 1000 Value Index. In absolute terms, holdings in energy and technology fueled gains for the fiscal year ended December 31, 2009. Relative to its benchmark, stock selection among financials, materials and consumer discretionary companies contributed to underperformance. Stock selections in energy and industrials benefited returns compared to its benchmark.
- The rebound from bear market to bull market was abrupt and pronounced in the period. U.S. stocks ended one of the most severe slides on record in March 2009 and replaced it with a broad rally covering most U.S. equity asset

classes for the fiscal year ended December 31, 2009. Among large-cap value stocks, rebounding consumer discretionary and financials stocks led the market advance.

- In financials, large banks and insurance companies came under intense pressure at the beginning of 2009 as the effects of bad loans and investment losses mounted. In this environment, positions in Bank of America and Wells Fargo detracted from returns as did holdings in insurers Lincoln National, The Hartford and Allstate.
- Economic weakness early during the reporting period also caused metals and chemicals companies to experience slack demand and price weakness for their products. In this environment, the share prices of Dow Chemical and aluminum company Alcoa declined.
- Among energy stocks, firming oil prices later during the reporting period triggered share price increases for holdings in

exploration and production companies. In this environment, Diamond Offshore Drilling advanced as the company reported earnings in excess of analysts' estimates. Halliburton shares also climbed as management of the world's second-largest oilfield services provider predicted that a North American profit margin squeeze may be close to bottoming out. An underweight position in integrated oil companies also benefited returns.

- Among industrials, shares of printer R.R. Donnelley advanced as investors expressed confidence in the company's growth plan, which intends to take advantage of economic turmoil by making strategic acquisitions. Shares of 3M Corp, which produces products ranging from scotch tape to inhalers, rose as the company raised its full-year outlook and the company improved its supply chains and strengthened its brands.

Total Returns for the periods ended 12/31/09 (*Average Annual Total Return)

	1 Year	5 Year*	Inception*†
NFJ Dividend Value Portfolio (Class I)	10.66%	0.18%	5.03%
Russell 1000 Value Index††	19.69%	(0.25)%	4.49%

Performance quoted represents past performance. Past performance is no guarantee of future results. Investment return and the principal value of an investment will fluctuate. Shares may be worth more or less than original cost when redeemed. Current performance may be lower or higher than performance shown. For performance current to the most recent month-end, please visit <http://www.allianzinvestors.com/PremierVIT>. Total return calculations do not reflect the deduction of additional charges imposed in connection with investing in variable contracts and assume reinvestment of all dividends and distributions.

† The Portfolio commenced operations on 7/1/03. Index comparisons began on 6/30/03.

†† It is not possible to invest directly in an index.

Shareholder Expense Example for the period ended 12/31/09 (Class I)

	Beginning Value	Ending Value	Expenses Paid
Actual Performance	\$1,000.00	\$1,222.40	\$5.60
Hypothetical Performance (5% return before expenses)	\$1,000.00	\$1,020.16	\$5.09

Expenses are equal to the Portfolio's annualized expense ratio of 1.00%, multiplied by the average account value over the period, multiplied by 184/365 (to reflect the number of days in the period).

(1) Assumes reinvestment of all dividends and distributions.

(2) Inclusive of custody expenses offset by credits earned on cash balances at the custodian bank (See (1)(g) in Notes to Financial Statements).

(3) During the fiscal years indicated above, the Investment Manager waived all of its fee and reimbursed a portion of the Portfolio's expenses. If such waivers and reimbursements had not been in effect, the ratio of expenses to average net assets and the ratio of net investment income to average net assets would have been 2.38% and 2.78%, respectively for the year ended December 31, 2009, 2.11% and 2.21%, respectively, for the year ended December 31, 2008; 2.90% and 0.49%, respectively, for the year ended December 31, 2007; 2.16% and 1.28%, respectively for the year ended December 31, 2006; 2.81% and 0.76%, respectively, for the year ended December 31, 2005.

See accompanying Notes to Financial Statements.

Premier VIT
NFJ Dividend Value Portfolio
NOTES TO FINANCIAL STATEMENTS

December 31, 2009

1) Organization and Significant Accounting Policies

Premier VIT (the "Trust"), was organized on May 12, 1994 as a Massachusetts business trust and is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as a diversified, open-end management investment company. The Trust is authorized to issue an unlimited number of shares of beneficial interest at \$0.01 par value. Effective October 5, 2009, the outstanding shares of the Trust were redesignated as "Class I" and the Trust began offering Class II shares of the Portfolio. On December 23, 2009, Class II shares were liquidated and no longer offered. The Trust is comprised of: NFJ Dividend Value Portfolio (the "Portfolio"), NACM Small Cap Portfolio, OpCap Managed Portfolio and OpCap Mid Cap Portfolio. In December 2009, the Board of Trustees of the Trust approved the closing and termination of the Trust, the Portfolio, NACM Small Cap Portfolio, OpCap Managed Portfolio and OpCap Mid Cap Portfolio, which will occur on April 30, 2010. Allianz Global Investors Fund Management LLC (the "Investment Manager") serves as the Trust's Investment Manager. The Investment Manager is an indirect, wholly-owned subsidiary of Allianz Global Investors of America L.P. ("Allianz Global"). Allianz Global is an indirect, wholly-owned subsidiary of Allianz SE, a publicly traded European insurance and financial services company.

The Portfolio's primary objective is to seek income and the secondary objective of long-term growth of capital. It seeks to meet its objectives, under normal conditions, by investing at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in equity securities consisting primarily of income-producing common stocks of companies with market capitalizations of more than \$2 billion at the time of investment.

The accompanying financial statements and notes thereto are those of the Portfolio. The financial statements of the other portfolios are presented in separate reports. The Trust is an investment vehicle for separate accounts of various life insurance companies which fund variable annuity and variable life insurance contracts, as well as for qualified pension and retirement plans.

The preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from these estimates.

In the normal course of business, the Trust enters into contracts that contain a variety of representations which provide general indemnifications. The Trust's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Trust that have not yet been asserted. However, the Trust expects the risk of any loss to be remote.

The following is a summary of significant accounting policies consistently followed by the Portfolio:

(a) Valuation of Investments

Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Market value is generally determined on the basis of last reported sales prices, or if no sales are reported, based on quotes obtained from a quotation reporting system, established market makers, or independent pricing services.

Portfolio securities and other financial instruments for which market quotations are not readily available or if a development/event occurs that may significantly impact the value of a security are fair-valued, in good faith, pursuant to procedures established by the Board of Trustees, or persons acting at their discretion pursuant to procedures established by the Board of Trustees. Portfolio securities and other financial instruments other than debt securities listed on a national securities exchange or traded in the over-the-counter National Market System are valued each business day at the last reported sales price; if there are no such reported sales, the securities are valued at the last quoted bid price. Other Portfolio securities traded over-the-counter and not part of the National Market System are valued at the last quoted bid price. The market value for NASDAQ National Market and Small Cap securities may be calculated using the NASDAQ Official Closing Price instead of the last reported sales price. Short-term securities maturing in 60 days or less are valued at amortized cost, if their original term to maturity was 60 days or less or by amortizing their value on the 61st day prior to maturity, if their original term to maturity exceeded 60 days. The prices used by the Portfolio to value securities may differ from the

**Premier VIT
 NFJ Dividend Value Portfolio
 NOTES TO FINANCIAL STATEMENTS**

**December 31, 2009
 (continued)**

(1) Organization and Significant Accounting Policies (continued)

(a) Valuation of Investments (continued)

value that would be realized if the securities were sold and the differences could be material to the Portfolio's financial statements. The Portfolio's net asset value is normally determined daily at the close of regular trading (normally, 4:00 pm Eastern Time) on the New York Stock Exchange ("NYSE") on each day the NYSE is open for business.

(b) Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (*i.e.* the "exit price") in an orderly transaction between market participants. The three levels of the fair value hierarchy are described below:

- Level 1 – quoted prices in active markets for identical investments that the Portfolio has the ability to access
- Level 2 – valuations based on other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.) or quotes from inactive exchanges
- Level 3 – valuations based on significant unobservable inputs (including the Portfolio's own assumptions in determining the fair value of investments)

An investment asset's or liability's level within the fair value hierarchy is based on the lowest level input, individually or in the aggregate, that is significant to fair value measurement. Even if there has been significant decrease in the volume and level of activity for an asset or liability and regardless of the valuation techniques used, the objective of a fair value measurement remains the same.

The valuation techniques used by the Portfolio to measure fair value during the fiscal year ended December 31, 2009 maximized the use of observable inputs and minimized the use of unobservable inputs.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

A summary of the inputs used at December 31, 2009 in valuing the Portfolio's assets and liabilities is listed below:

	Level 1- Quoted Prices	Level 2- Other Significant Observable Inputs	Level 3- Significant Unobservable Inputs	Value at 12/31/09
Investments in Securities – Assets				
Common Stock	\$3,136,713	–	–	\$3,136,713
Total Investments in Securities	\$3,136,713	–	–	\$3,136,713

(c) Investment Transactions and Investment Income

Investment transactions are accounted for on the trade date. Realized gains and losses on investments are determined on the identified cost basis. Dividend income is recorded on the ex-dividend date. Interest income is recorded on an accrual basis. Discounts or premiums on debt securities purchased are accreted or amortized to interest income over the lives of the respective securities using the effective interest method. Payments received from certain investments may be comprised of dividends, realized gains and return of capital. The payments may initially be recorded as dividend income and may subsequently be reclassified as realized gains and/or return of capital upon receipt of information from the issuer.

(d) Federal Income Taxes

The Portfolio intends to distribute all of its taxable income and to comply with the other requirements of the U.S. Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, no provision for U.S. federal income taxes is required.

Premier VIT
NFJ Dividend Value Portfolio
NOTES TO FINANCIAL STATEMENTS

December 31, 2009
(continued)

(1) Organization and Significant Accounting Policies (continued)

(d) Federal Income Taxes (continued)

Accounting for uncertainty in income taxes establishes for all entities, including pass-through entities such as the Portfolio, a minimum threshold for financial statement recognition of the benefit of positions taken in filing tax returns (including whether an entity is taxable in a particular jurisdiction), and requires certain expanded tax disclosures. The Portfolio's management has determined that its evaluation of the Interpretation has resulted in no material impact to the Portfolio's financial statements at December 31, 2009. The Portfolio's federal tax returns for the prior three fiscal years remain subject to examination by the Internal Revenue Service.

(e) Dividends and Distributions to Shareholders

Dividends and distributions to shareholders from net investment income and net realized capital gains, if any, are declared and paid at least annually. The Portfolio records dividends and distributions to shareholders on the ex-dividend date. The amount of dividends and distributions are determined in accordance with federal income tax regulations, which may differ from generally accepted accounting principles in the United States of America. These "book-tax" differences are considered either temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal income tax treatment; temporary differences do not require reclassification. To the extent dividends and/or distributions exceed current and accumulated earnings and profits for federal income tax purposes, they are reported as dividends and/or distributions of paid-in-capital in excess of par.

(f) Allocation of Expenses

Expenses specifically identifiable to the Portfolio are borne by the Portfolio. Other expenses are allocated to each portfolio of the Trust based on its net assets in relation to the total net assets of all applicable portfolios of the Trust or another reasonable basis.

(g) Custody Credits Earned on Cash Balances

The Portfolio has an expense offset arrangement with its custodian bank whereby uninvested cash balances earn credits which reduce monthly custodian and accounting agent expenses. Had these cash balances been invested in income producing securities, they would have generated income for the Portfolio.

(h) Trustees' Retirement Plan

The Trust offers defined benefits to the former independent Trustees through the Trust's Retirement Plan for Independent Trustees, (the "Plan"). The Plan is an unfunded non-qualified defined benefit plan under Section 409A of the Internal Revenue Code of 1986 (the "Code"), as amended. Participating trustees receive benefits upon the specified retirement age or event. Obligations of the Plan are expected to be paid from the assets of the Trust. Each Portfolio is allocated a portion of the obligation based on the respective net assets of the Portfolios participating in the Plan. At December 31, 2009, the Portfolio's payable in connection with the Plan was \$1,600. A net expense related to the Plan of \$6,118 is included in Trustees' fees and expenses on the Statement of Operations.

NFJ Dividend Value Portfolio
NOTES TO FINANCIAL STATEMENTS**

**December 31, 2009
(continued)**

(1) Organization and Significant Accounting Policies (continued)

(h) Trustees' Retirement Plan (continued)

Summary information for the Plan at the Trust level is as follows, based on the valuation performed on December 31, 2009:

Change in benefit obligation:

Projected benefit obligation at beginning of year	\$ (811,453)
Benefits paid	667,346
Interest cost	(20,321)
Actuarial gain/loss	<u>(21,518)</u>
Projected benefit obligation at end of year	<u>\$ (185,946)</u>
Funded status	<u><u>\$ (185,946)</u></u>
Accumulated benefit obligation/Accrued pension cost	<u><u>\$ 166,768</u></u>

Projected benefit payments:

2010	\$ 203,440
----------------	------------

Amount anticipated to be recognized in expense for fiscal period 2010:

Net loss (gain)	<u>\$ 29,191</u>
---------------------------	------------------

Determination of the projected benefit obligation was based on the following assumptions for the year ended December 31, 2009: discount rate of 4.00%; mortality rate based upon SSMort 2004 for Males and Females. The Plan will be terminated effective March 31, 2010.

(2) Principal Risk

In the normal course of business, the Portfolio trades financial instruments and enters into financial transactions where risk of potential loss exists due to, among other things, changes in the market (market risk). The Portfolio is exposed to various risks such as, but not limited to, market price risk.

The market values of equity securities, such as common stock and preferred stock or equity-related investments, such as options, may decline due to general market conditions which are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. They may also decline due to factors which affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. Equity securities and equity-related investments generally have greater market price volatility than fixed income securities.

(3) Investment Manager/Sub-Adviser/Distributor

The Trust, on behalf of the Portfolio, has an Investment Advisory Agreement (the "Agreement") with the Investment Manager. Subject to the supervision of the Trust's Board of Trustees, the Investment Manager is responsible for managing, either directly or through others selected by it, the Portfolio's investment activities, business affairs and administrative matters. Pursuant to the Agreement, the Investment Manager will receive an annual fee, payable monthly at the annual rate of 0.80% on the first \$400 million of the Portfolio's average daily net assets, 0.75% on the next \$400 million of average daily net assets and 0.70% of average daily net assets thereafter. The Investment Manager is contractually obligated to waive that portion of the advisory fee and to assume any necessary expenses to limit total operating expenses of the Portfolio to 1.00% of average daily net assets (net of custody credits earned on cash balances at the custodian bank) on an annual basis.

Premier VIT
NFJ Dividend Value Portfolio
NOTES TO FINANCIAL STATEMENTS

December 31, 2009
(continued)

(3) Investment Manager/Sub-Adviser/Distributor (continued)

The Investment Manager has retained its affiliate, NFJ Investment Group LLC (the “Sub-Adviser”), to manage the Portfolio's investments. Subject to the supervision of the Investment Manager, the Sub-Adviser is responsible for making all of the Portfolio's investment decisions. The Investment Manager and not the Portfolio pays a portion of the fees it receives to the Sub-Adviser in return for its services.

Allianz Global Investors Distributors LLC (“the Distributor”), an affiliate of the Investment Manager, serves as the distributor of the Trust's shares. Pursuant to a distribution agreement with the Trust, the Investment Manager on behalf of the Portfolio pays the Distributor.

(4) Investments in Securities

For the year ended December 31, 2009, purchases and sales of securities, other than short-term securities and U.S. government obligations, aggregated were \$3,343,434 and \$5,054,712, respectively.

(5) Income Tax Information

The tax character of dividends paid during the years ended December 31, were:

	2009	2008
Ordinary Income	\$165,732	\$139,000

At December 31, 2009, the tax character of distributable earnings of \$1,601 was comprised entirely from ordinary income.

In accordance with U.S. Treasury regulations, the Portfolio elected to defer realized long-term capital losses of \$2,936 arising after October 31, 2009. Such losses are treated for tax purposes as arising on January 1, 2010.

For the year ended December 31, 2009, permanent “book-tax” differences were attributable to the write off of capital losses due to ownership changes under Section 382 of the Internal Revenue Code. These adjustments were to decrease accumulated net realized loss on investments and decrease paid in capital in excess of par by \$1,162,470.

At December 31, 2009, the Portfolio had a capital loss carry forward of \$909,883 (all of which will expire in 2017) available as a reduction, to the extent provided in the regulations, of any future net realized gains. To the extent that these losses are used to offset future realized capital gains, such gains will not be distributed.

The cost basis of portfolio securities for federal income tax purposes is \$2,891,581. Aggregate gross unrealized appreciation for securities in which there is an excess value over tax cost is \$273,061 and aggregate gross unrealized depreciation for securities in which there is an excess of tax cost over value is \$27,929. Net unrealized appreciation for federal income tax purposes is \$245,132. The difference between book and tax basis unrealized appreciation/depreciation is primarily attributable to wash sales.

(6) Beneficial Interest Shares

As of December 31, 2009, changes in beneficial interest shares were as follows:

<u>Class I</u>	<u>Shares</u>	<u>Amount</u>
Year ended December 31, 2009:		
Shares sold	168,550	\$1,190,633
Shares issued in reinvestment of dividends	19,292	165,732
Shares redeemed	<u>(410,640)</u>	<u>(3,200,632)</u>
Net increase (decrease) in shares outstanding	<u>(222,798)</u>	<u>\$(1,844,267)</u>
Year ended December 31, 2008:		
Shares sold	392,339	\$4,402,632
Shares issued in reinvestment of dividends	17,419	139,000
Shares redeemed	<u>(73,955)</u>	<u>(891,109)</u>
Net increase (decrease) in shares outstanding	<u>335,803</u>	<u>\$3,650,523</u>
 <u>Class II</u>		
Period October 5, 2009† through December 23, 2009††:		
Shares sold	1,221	\$10,000
Shares redeemed	<u>(1,221)</u>	<u>(10,987)</u>
Net increase (decrease) in shares outstanding	<u>—</u>	<u>\$(987)</u>

† Class inception date
†† Class liquidation date

(7) Legal Proceedings

In September 2004, the Investment Manager, PEA Capital LLC (“PEA”) and the Distributor settled a regulatory action with the SEC that alleged violations of various antifraud provisions of the federal securities laws in connection with an alleged market timing arrangement involving trading of shares of certain open-end funds not in the Trust and advised by the Investment Manager. PEA, the Distributor and Allianz Global reached a settlement relating to the same subject matter with the Attorney General of the State of New Jersey in June 2004. Allianz Global, the Investment manager, PEA and the Distributor paid a total of \$68 million to the SEC and New Jersey to settle the claims related to market timing. In addition to monetary payments, the settling parties agreed to undertake certain corporate governance, compliance and disclosure reforms related to market timing, and consented to cease and desist orders and censures. The settling parties did not admit or deny the findings in these settlements. None of these settlements alleged that any inappropriate activity took place with respect to the Portfolio. Subsequent to these events, PEA deregistered as an investment adviser and dissolved.

Since February 2004, Allianz Global, the Investment Manager, the Distributor, PEA and certain of their employees have been defendants in eleven lawsuits filed in various jurisdictions, which have been transferred to and consolidated for pre-trial proceedings in a multi-district litigation proceeding in the U.S. District Court for the District of Maryland. The lawsuits generally relate to the same allegations that are the subject of the regulatory proceedings discussed above. The lawsuits seek, on behalf of fund shareholders or the funds themselves, among other things, unspecified compensatory damages plus interest and, in some cases, punitive damages, the rescission of investment advisory contracts, the return of fees paid under those contracts, restitution and waiver of or return of certain sales charges paid by fund shareholders.

It is possible that these matters and/or other developments resulting from these matters could result in increased Portfolio redemptions or other adverse consequences to the Portfolio. However, the Investment Manager, the Sub-Adviser and the Distributor believe that these matters are not likely to have a material adverse effect on the Portfolio or on the Investment Manager’s, the Sub-Adviser’s or the Distributor’s ability to perform their respective investment advisory or distribution services relating to the Portfolio.

(8) Board of Trustees Changes

On September 10, 2009, Diana L. Taylor resigned as a Trustee of the Trust.

On December 14, 2009, James A. Jacobson joined the Board of Trustees.

(9) Subsequent Events

Portfolio management has determined there were no subsequent events following the year ended December 31, 2009 through February 18, 2010, which is the date the financial statements were issued.

**Premier VIT
NFJ Dividend Value Portfolio**

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

**To the Shareholders and the Board of Trustees of
Premier VIT—NFJ Dividend Value Portfolio**

In our opinion, the accompanying statements of assets and liabilities, including the schedules of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Premier VIT (the "Trust")—NFJ Dividend Value Portfolio (one of the portfolios of Premier VIT, hereafter referred to as the "Portfolio") at December 31, 2009, the results of each of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Portfolio's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2009 by correspondence with the custodian and brokers, provide a reasonable basis for our opinion.

As noted in Footnote 1, in December 2009, the Board of Trustees for the Trust approved the closing and termination of the Trust, the Portfolio and affiliated portfolios in the Trust.

Tax Information:

Subchapter M of the Internal Revenue Code of 1986, as amended, requires the Portfolio to advise shareholders within 60 days of the Portfolio's tax year-end (December 31, 2009) as to the federal tax status of dividends and distributions received by shareholders during such year.

Pursuant to the Jobs and Growth Tax Relief Reconciliation act of 2003, the Portfolio designates 100% of ordinary dividends paid (or the maximum amount allowable) as qualified dividend income.

The Portfolio designates 96% of ordinary dividends paid (or the maximum amount allowable) as qualifying for the Dividends Received Deduction.
